

Mechanical Engineer

Highland, IL

Job Summary: Plan, conduct, and direct the mechanical portion of engineering projects of major significance requiring the application of advanced knowledge in electrical/electronic packaging. Originate mechanical design and apply new and creative techniques. Must have good communicative and coordinative skills to supply technical advice and counsel to management and other professionals. May represent the company in outside discussions.

Reports to: Mechanical Engineering Manager

Essential Duties:

- Demonstrate good communicative skills.
- Plan and develop mechanical product designs.
- Proficient in the use of AutoCAD and Autodesk Inventor.
- Create, modify, and maintain product hardware documentation.
- Develop and maintain schedules for new product development and sustaining projects.
- Coordinate between departments or assigned jobs and/or projects.
- Ensure that all documentation is complete, checked, and approved on assigned jobs or projects.
- Release jobs or projects to production.
- Act as Mechanical Engineering representative in discussions.
- Generate Engineering Change Orders (ECO's) on jobs or projects as assigned.
- Develop the Mechanical Engineering aspects of quotes including the specification review and engineering design estimate.
- Develop new ideas and concepts for improvement in Engineering Operations.
- Travel as required for training, support of project tasks, product issues, or other design- or job-related needs.
- Perform other duties as assigned.

Requirements:

- B.S.M.E. degree.
- One to three years' experience preferred.
- AutoCAD experience preferred.
- Proficient in the use of Desktop Software (Excel, Word and Power Point).
